### **DETAILED ACTION**

Claims 1 – 20 have been presented for examination. Claims 1, 7, 14, 15 and 16 have been amended in an amendment filed 11/27/2006.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 11/27/2006 has been entered.

#### ***Allowable Subject Matter***

Claims 1 – 20 are allowed.

The following is an examiner's statement of reasons for allowance: The closest cited prior arts (U.S. Patent Publication No 2003/0026453 and U.S. Patent No. 5,144,669) fail to disclose, teach, or suggest after scrambling the clear stream according to the first encryption method to provide the first encryption stream and after the scrambling the clear stream according to the second encryption method to provide the second encryption stream, passing packets of the clear stream through a multiplexer, wherein when the at least one

Art Unit: 2131

critical packet is identified in the packets of the clear stream, the critical packet of the clear stream drops and the scrambled critical packets included in the first and second encryption streams pass. Although Unger discloses a select-then-encrypt system, it fails to disclose an encrypt-then-select system as claimed. In Unger, a select-then-encrypt system, when a critical packet is sensed in a clear stream, only the critical packets are encrypted and then multiplexed. However, according to the claim presented above, an encrypt-then-select system, without regard to critical packets, the clear stream is encrypted according to a first encryption method and encrypted according to a second method. Then, when the critical packet in the clear stream is sensed, the already-encrypted packets corresponding to the critical packet are selected for the multiplexer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
